Bell System

Telephone management and operation never stand still. They cannot stand still. The dependency upon them of every important factor in our commercial, industrial and social life precludes any relaxation or suspension of activity.

The Great War caused the demand to overtake the reserve facilities and equipment of the Bell System and for a time it was nip and tuck between demand and supply. Now that the War is ended the Bell System is planning to spend \$125,000,000 in new construction in the next two years and to once more get ahead of the immediate needs of the public and back to its former position of Ready to Serve.

Rates must be charged to meet present cost scales. But these rates are charged the public for the benefit of the public. Telephone service is a public service and must be maintained at the maximum of efficiency and comprehensiveness at any cost.
